Election Trust & Scytl Form US Partnership To Provide Secure, Receipt-Enabled Private Sector eVoting

Bellevue, WA (June 6, 2008) - Election Trust LLC of Seattle, Washington and Scytl Secure Electronic Voting S.A. of Barcelona, Spain, have entered into an agreement by which Election Trust will use Scytl's patented Pnyx™ eVoting platform to offer Internet voting services to its private sector customers in the United States. Unique to Pnyx™ is a patented 'Counted as Cast' receipt capability to allow every eVoter to verify their secure, encrypted internet ballot has been included in Election Trust's electronic ballot box.

Pnyx has been permanently installed in a secure and fully-redundant data center in Seattle which is be managed by Election Trust with Scytl's technical support. Election Trust and Scytl are also collaborating in joint marketing campaigns to promote the partnership in the United States.

"Scytl has a proven the Pnyx™ balloting platform in the international public sector", said Election Trust Managing Partner, John Bodin, "We excited to now offer our private sector clients this global standard in secure and transparent eVoting technology."

Pablo Sarrias, Scytl's VP Sales & Marketing, stressed the importance of the companies' partnership, "Scytl is proud of our reputation as the global leader in electronic remote voting technology. With Election Trust we have a private sector partner committed to furthering that reputation in America."

For more information and a 'Test Drive' of the Pnyx™ eVoting platform go to www.electiontrust.com/index-6.html .
